

LEARN ABOUT YOUR CLEAN ELECTRICITY NEIGHBORS

An electric transmission line runs through your town.

Transmission lines carry electricity from the places where it is made to your neighborhood.

Workers are taking down the old transmission lines and putting up new lines. The new lines can carry more clean electricity made by the sun, wind and water. You might see us working if you live or drive by the lines.

We are taking down old poles and lines that look like this:

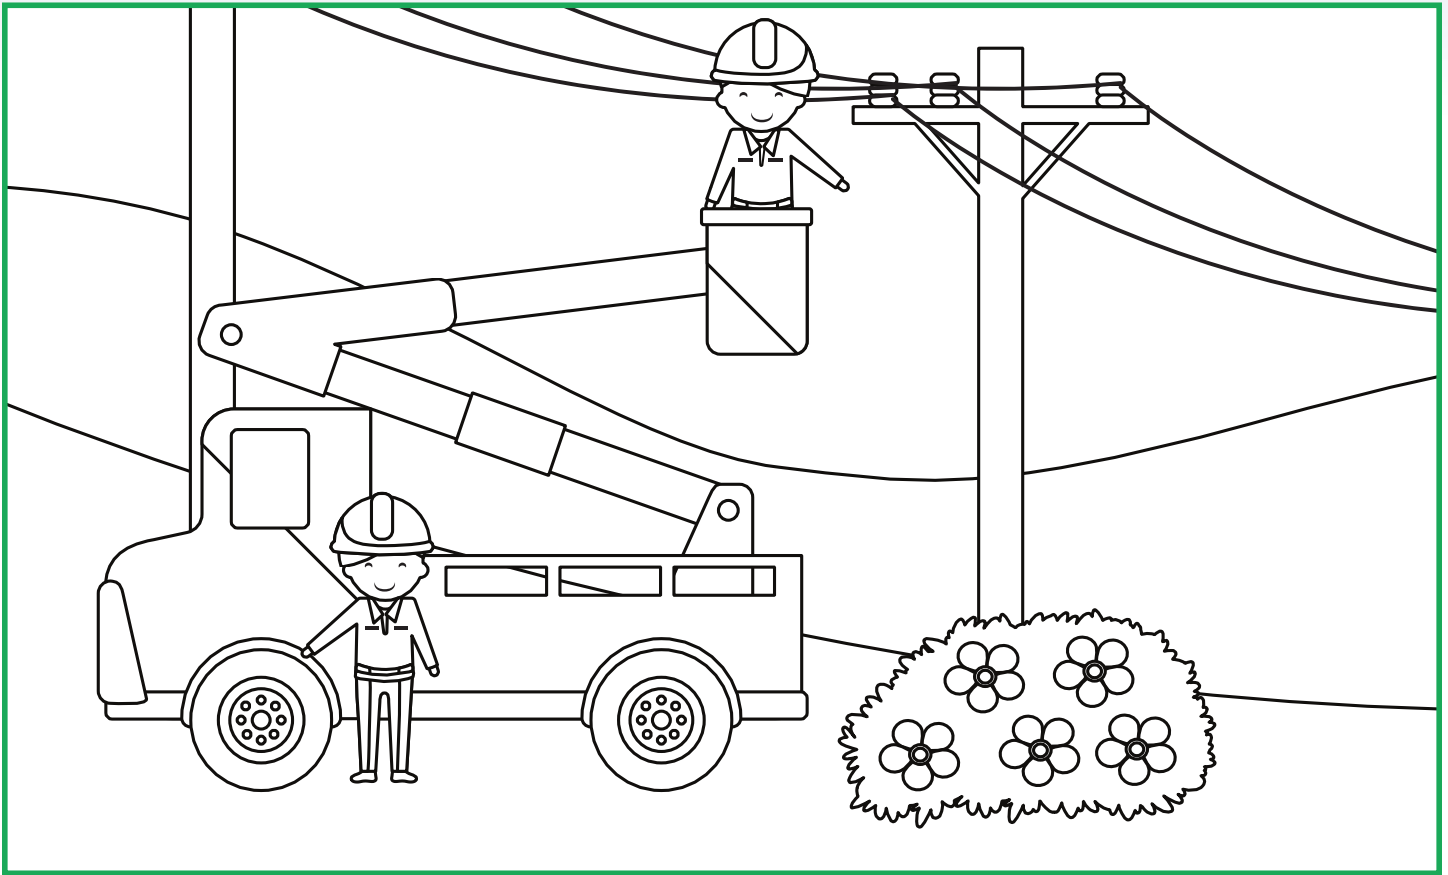

And putting up new poles and lines that look like this:

Color the transmission line worker!
