

# Modernization in 11 Area Towns Will Advance Clean Energy

Start Date: ■ 2021 ■ 2022

## Pardon Our Dust ... Clean Energy Ahead!

- Safety is our top priority. Please refrain from entering work zones, all of which are on utility-owned property.
- Our employees and trucks will be in your area on an intermittent and phased basis between 2021 and 2023.
- Our two-week construction schedule is posted at NY-ES.com.
- Work hours are generally Mon.-Sat., 7 a.m.-7 p.m.
- We strive to protect agricultural lands and the environment through special protective measures.

## Questions About Our Project?

# We're Building New York's Clean Energy Future

**A modernization of the electric transmission system in the Hudson Valley**

*Proudly Constructed By*

**New York Transco**

# Helping New York Achieve Nation-Leading Clean Energy & Climate Change Goals

Our **New York Energy Solution** project will advance New York's move to 100% emission-free energy by 2040 by delivering more renewable energy to businesses and homes.

PRESENT CORRIDOR CONFIGURATIONS

FUTURE CORRIDOR CONFIGURATION

## More Clean Energy With Fewer Structures

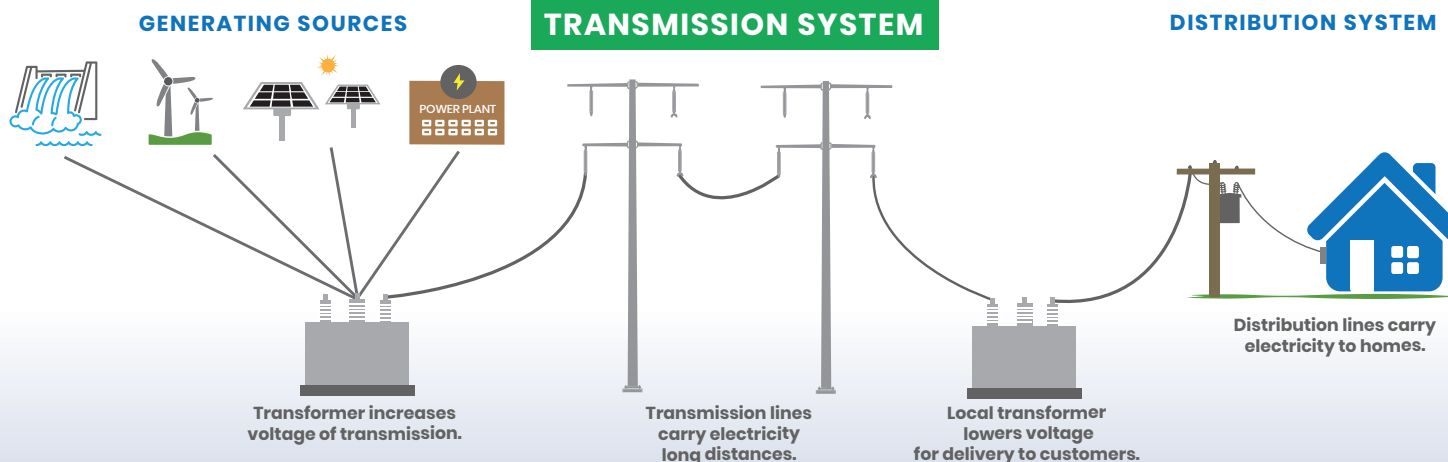

We will replace 80-year-old transmission lines and structures along an existing 54-mile, three-county transmission corridor with modern, streamlined structures — approximately 230 fewer.

All of our work will take place on existing utility-owned lands between 2021 and 2023.

## The New York Energy Solution will:

- Alleviate energy bottlenecks to deliver more renewable energy to customers
- Create a more resilient and reliable electric grid for everyone who lives, works and visits here
- Support good-paying construction jobs
- Generate additional tax revenue for local communities
- Be a good neighbor

## Transmission is the Backbone of Energy Delivery to Our Neighborhoods
